

**Compact, lightweight and quiet cleaning**  
The new Systainer dust extractor CTL SYS.

CLEANTEC CTL SYS

**FESTOOL**  
Tools for the toughest demands

**FESTOOL**

## At home on the road. **The first dust extractor in Systainer format.**

Measuring just 396 mm long and 270 mm high, the CLEANTEC CTL SYS is small and compact, and with the hose holder removed, it is just 162 mm high.

Light and perfectly integrated in the Festool Systainer System, the CTL SYS provides maximum mobility and flexibility on the road. It achieves the best possible cleaning results for dust extraction and final cleaning of all dust in dust category L.

# Making good work even better. The CTL SYS.

The CTL SYS makes mobile dust extraction easier. It comes with a useful shoulder strap for convenient transportation and when used with the electric eccentric sander ETS EC 150/5, for example, the result is impressive suction power with spotless results.

**Easy to transport:** Thanks to the shoulder strap supplied with it, the CTL SYS is easy to carry, leaving your hands free for any other tools or materials you might need.

**Mobile dust extraction:** When combined with the SYS-Cart, the CTL SYS gets a set of wheels, allowing it to follow you with the cumulative suction power of the 1,000 W turbine virtually every step of the way.

**Sophisticated, convenient and compact:** Whether you are working with tools or carrying out a final clean with a floor cleaning set, the removable hose holder and shoulder strap help make working with the CTL SYS as convenient as possible.

# CTL SYS

**Mobile workbench with dust extraction:**  
Coupled with the SYS-MFT workbench, it makes cutting pipes to length an easy and clean job.

**Spotless, right down to the very last corner:**  
The CTL SYS has an integrated crevice nozzle and upholstery nozzle always close to hand for a clean finish, even in hard-to-reach places.

## SERVICE all-inclusive

**Spotless service:** With our money-back guarantee, it gives you the option to road-test the CTL SYS at your leisure for 15 days.

# Handling: **Excellent**

## User-friendliness: **Excellent**

The Systainer dust extractor CTL SYS demonstrates yet again what the name 'Festool' stands for: high functionality, strong performance and easy operation.

**Compact and always tidy:** The removable hose holder ensures that nothing sticks out and you don't get caught anywhere while carrying the CTL SYS. It is also ready to use at all times because the hose is already connected to the dust extractor.

**Never forget a thing because it's all there:** The upholstery nozzle and crevice nozzle included are integrated in the Systainer dust extractor to prevent loss and are always quick at hand.

**Easy to transport:** Carrying the CTL SYS leaves you with both hands free because it can conveniently be carried with the shoulder strap. It also comes with another benefit, the shoulder strap can be attached either to the hose holder or to the dust extractor.

**Automatic dust extraction:** The appliance socket with automatic switch-on/off activates the CTL SYS as soon as you start up a connected power tool. It can also be switched to manual mode for cleaning work.

**Easy on the ears:** At a quiet 67 dB, the CTL SYS carries out its work with a particularly low level of noise, protecting not just your hearing but your customers too.

**Quick access:** The dust box in the dust extractor can be removed and reinserted easily at the touch of a button for cleaning or changing the filter.

# A better system.

The newest member of the CLEANTEC dust extractor family, the Systainer dust extractor CTL SYS gets to work where the situation particularly requires clean results combined with mobility. Festool also offers a wide range of CLEANTEC dust extractors covering every application, for dust categories L, M and H. All mobile dust extractors are developed and manufactured by Festool – making them compatible with all Festool power tools and air tools. Achieving clean results and a high level of customer satisfaction, all dust extractors also contribute towards keeping you healthy.

**Spotless on the road:  
The CLEANTEC CTL SYS.**  
Compact, mobile and powerful, this Systainer-format dust extractor is ideally suited for maintenance and installation work.

**The mobile dust extractor all-rounder:  
The CLEANTEC CT 26.**  
With a 36 or 48 L volume, an AUTOCLEAN automatic filter cleaning for consistently high suction power.

**True size:  
The CLEANTEC CT 48.**  
Big on volume, big on suction power. Perfectly suited for continuous industrial operation. Also available as a specialist mobile dust extractor for hazardous dusts.

**Because clean is just healthier.**

# An easy system.

The new CTL SYS fits the Festool Systainer System perfectly and can be coupled with Systainers and Sortainers incredibly easily. The ideal base for it? The stair-climbing Systainer Transporter SYS-Roll. There is also room for the floor cleaning set and the mobile workbench SYS-MFT. Be ready for anything when you're on the road and save time and energy with clever system solutions, even before you get to work.
